

TECHNICAL DATA

STRIP STEEL and UNIBLOK INOX – W4

Material and dimensions :

Band 30 m : width 9 mm, thickness 0,6 mm, austenitic stainless steel AISI 304 EN 1.4301.

Continuous threaded 30 meter band pressed and raised, rounded edges to prevent damages to the pipe.

Screw : size 7 mm, cross slotted-hexagon head, austenitic stainless steel AISI 304 EN 1.4301.

Upper and lower housing : austenitic stainless steel AISI 304 EN 1.4301.

Locking mechanism : austenitic stainless steel AISI 304 EN 1.4301.

Main characteristic :

30m continuous band packaging in ABS plastic dispenser.
Fastest solution to make every range of clamps.
The locking device is made with tilting housing, with screw.

Safe working torque : 3 Nm

Running test : 3 Nm

Free torque : 0,2 Nm
